JUNIOR JAVA SOFTWARE DEVELOPER (F/M)

WHO WE ARE

CrefoPayment GmbH & Co. KG, based in Berlin Schöneberg, is dedicated to providing merchants with a reliable solution to accept payments with all common payment methods, both in e-commerce and via POS. We collaborate with the Creditreform corporate group, one of the leading international suppliers of economic information and dunning services. By combining innovative strategies with cutting-edge technologies, we provide our customers with bespoke risk- and payment control, whilst offering an end-to-end solution at a fair price. We realise this by constantly improving our high-performance processing platform with unique fraud-prevention methods, making use of the full range of services offered by the Creditreform corporate group and through our professional, service-oriented team.

YOUR ROLE

- You develop and document high-quality source code and technical solutions
- You implement automatic unit, acceptance, and performance tests
- You discuss with your colleagues on development methodologies, technologies and implementation details
- You learn how to write source code with focus on cleanliness, quality, and security
- You report, debug, and fix issues in the product
- You participate in Scrum processes: conduct daily stand-ups; groom the backlog; analyse, estimate, and break down user stories; participate in sprint meetings
- You continuously educate yourself as well as your colleagues to acquire new skills
- You research new cutting-edge testing technologies and evaluate fitness for day-to-day use

WHAT WE OFFER

- A full-time position as Junior Java Developer (m/f) in Berlin
- A small, multidisciplinary, dynamic, and motivated team with a direct but informal corporate culture
- Opportunities for continuing education and promotion in the future
- Flexible workflows and working hours
- The chance to grow in our international start-up and actively participate in shaping its future
- The possibility to fully realize your ideas, your abilities, and to take responsibility
- A day-to-day routine with rapid decisions, interesting projects, and a high flexibility

WHAT YOU PROVIDE

- Master or Bachelor in Computer Science (or equivalent)
- Experience in Software Development
- Understanding of the software lifecycle and agile development
- Good Knowledge in Java with Spring and Hibernate
- Basic Knowledge in JavaScript, Ember.js, web development
- Interest in object-oriented design, clean code, design patterns, algorithmic, and data structures; you have a sound understanding of concurrency and cryptography
- The ability to communicate in English (verbal and written)

YOU ARE

- Passionate and motivated around software development, quality aware, and you have a good sense of responsibility and ownership.
- A logical thinker, able to abstract, and handle complex structures
- Curious and have a natural drive to reveal inner workings, learn new technologies and new strategies
- Able to organize and be self-reliant but still a team-player
- An excellent communicator, able to accept and give feedback
- Eager to learn and looking for a new challenge

YOUR ENTRY

If we raised your awareness, then we would love to hear from you. Please send your significant application documents (covering letter, curriculum vitae, testimonials) to bewerbung@crefopay.de
